Viruxeal

DESCRIPTION AND COMPOSITION:

Introduction Viruxeal is a powdered, oxidizing disinfectant with quick action, at low concentrations and broad microbiocidal spectrum. Contains 21.41% pentapotassium peroxymonosulphate and 1.50% sodium chloride as its active ingredients. Characteristics · Powdered and highly concentrated with 80% active ingredients · Very rapid action against pathogens · Oxidizing agents with no risk for any adaptation of microorganisms · Broad spectrum · Only active when it is necessary · Surfactants for excellent penetration · Thoroughly tested on efficacy, dermatology, biodegradability · Powdered and long shelf life (3 years) · Non corrosive in use dilutions for human and materials · Fully biodegradable

Product type: Disinfectant

Content: Pentapotassium Peroxymonosulfate

TARGET SPECIES:

Swine and Poultry.

INDICATIONS:

Viruxeal is a powdered, oxidizing disinfectant with quick action, at low concentrations and broad microbiocidal spectrum. Contains 21.41% pentapotassium peroxymonosulphate and 1.50% sodium chloride as its active ingredients.

ROUTE OF ADMINISTRATION:

For external use only

DOSAGE:

General Fogging: Prepare Viruxeal at dilution of 1% to 2% (1:100 to 1:50). Apply at an applicable rate of 1L to 120 sq. ft. of floor space.
