Tylvalosure 625mg/g

DESCRIPTION AND COMPOSITION:

Tylvalosure 625mg/g Granules is an off-white granule macrolide antibiotic product. Each gram contains 625mg of tylvalosin (as tartrate) as its active ingredient.

Product type: Water soluble powder

Content: Tylvalosure Granules 625mg / g

TARGET SPECIES:

Swine and Poultry.

INDICATIONS:

Chickens: Treatment and metaphylaxis of respiratory infections caused by Mycoplasma gallisepticum. The presence of the disease in the flock should be established before metaphylactic treatment. As an aid in reducing the development of clinical signs and mortality from respiratory disease in flocks, where infection in ovum with Mycoplasma gallisepticum is likely because the disease is known to exist in the parent generation.
Turkeys: Treatment of respiratory disease associated with tylvalosin sensitive strains of Ornithobacterium rhinotracheale.

ROUTE OF ADMINISTRATION:

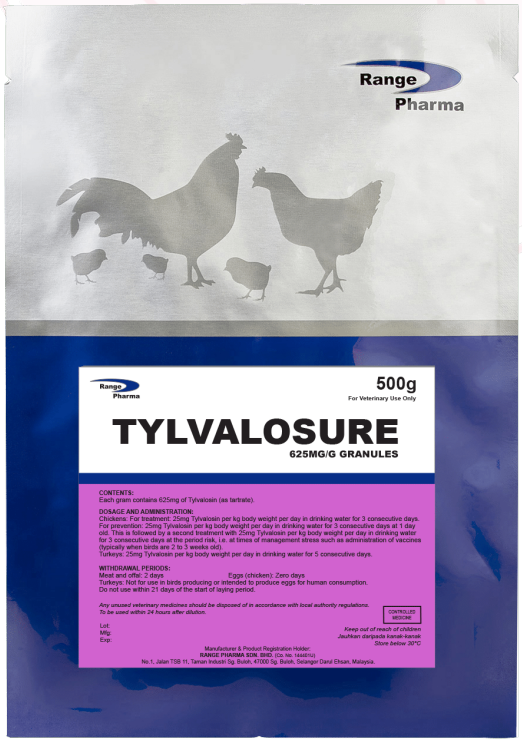
Oral, via drinking water

WITHDRAWAL PERIODS:

Meat and offal 2 days
Eggs (chickens) zero days
Turkeys – not for birds producing or intended to produce eggs for human consumption
do not use within 21 days of start of laying

DOSAGE:

Chickens: For treatment: 25mg tylvalosin per kg body weight per day in drinking water for 3 consecutive days. For prevention: 25mg tylvalosin per kg body weight per day in drinking water for 3 consecutive days at 1 day old. This is followed by a second treatment with 25mg tylvalosin per kg body weight per day in drinking water for 3 consecutive days at the period of risk, i.e. at times of management stress such as administration of vaccines (typically when birds are 2 to 3 weeks old).
Turkeys: 25mg tylvalosin per kg body weight per day in drinking water for 5 consecutive days.



SHELF LIFE:	PACK SIZE:
3 years	100g, 500g

WATER SOLUBLE POWDER
