Chick Acid

EXPORT ONLY

DESCRIPTION AND COMPOSITION:

Chick Acid is an acidifier feed additive blending phosphoric, malic, lactic and citric acids.

Product type: Feed additive

Content: Phosphoric acid, malic acid, lactic acid and citric acid

TARGET SPECIES:

Poultry.

INDICATIONS:

Improves digestibility and reduces the undigested fraction of the feed that can lead to indigestion, diarrhoea and mortality. Assists the balance and development of the endogenous lactobacillus flora. Limits the microbial overload in the digestive tract. Reduces the pH to its optimal value. Improves the use of calcium and minerals and results in better formation of poultry skeleton as well as better quality of eggshells. Reduces contamination of feed by Salmonella, yeast and mould.

ROUTE OF ADMINISTRATION:

Oral, in feed

WITHDRAWAL PERIODS:

Nil

DOSAGE:

Poultry: 1kg to 2kg per ton of feed

SHELF LIFE:	PACK SIZE:
3 years	25kg

FEED ADDITIVES

Acidifiers
